

WHERE INNOVATION Takes Root

Visit **Booth 429** to See How Iodine Helps CDI Teams Flourish!

Empowering Intelligent Care

Iodine is an enterprise AI company that is radically rethinking how healthcare is delivered, measured, and paid for.

Our Aware suite is deployed at hundreds of leading hospitals in the US, including some of the largest health systems in the country, and has quickly become the industry leader for clinical documentation integrity solutions, being recognized in 2022 as the Best in KLAS CDI Solution.

Predictive Insights that Transform Documentation Accuracy

The Aware suite of mid-revenue cycle solutions is powered by a vast set of clinical data. Our pioneering machine learning capability, CognitiveML™, continuously consumes raw clinical data across available patient records to generate real-time, clinically informed, predictive insights. When applied to key challenges in the clinical revenue cycle, Iodine solutions are proven to increase efficiency and performance outcomes.

The AwareCDI™ Suite

Concurrent
For CDIS

Interact
For CDIS & Physicians

Iodine and HCPro

A physician's answer to a query is only as strong as the query itself. The ACDIS library of compliant query templates from HCPro helps CDI specialists identify opportunities and write strong, complete, and compliant queries—all within the Interact™ platform.

From Our Users

Getting a true baseline measure of physician satisfaction is difficult, but I can tell you the difference is palpable. It's the only technology I can recall adopted voluntarily by Hopkins physicians because they liked it.

- PHYSICIAN LEADER, JOHNS HOPKINS MEDICINE
