

Case Study – Newborns and Perinatal Conditions Answer Sheet

Please list all possible conditions/diseases and procedures, if any, found in the medical record. For each condition/disease, identify the type of treatment/evaluation (e.g., drug, diagnostic study, etc.). For every applicable diagnosis code please assign the POA indicator. For each procedure, list the indication(s) for the procedure. Assign ICD-10-CM codes for all treated/evaluated conditions/diseases and ICD-10-PCS codes for all documented procedures.

Condition/Disease	Type of Treatment/Evaluation	ICD-10-CM/POA
1. Single liveborn at hospital by vaginal delivery		Z38.00-Exempt
2. Physiologic hyperbilirubinemia	Bilirubin tests	P59.9-N

Possible Physician Queries?

Rationale:

Per *Coding Clinic*, January 1994:

Question: The physician notes "jaundice" in the record and on the face sheet but the infant is not treated for this condition. Should this be coded because the physician documents this condition?

Answer: Yes, assign code 774.6 [P59.9], Unspecified fetal and neonatal jaundice, because the physician has noted this condition in the final diagnostic statement

Caution: This is an ICD-9 Coding Clinic but was in respect to documentation not a code set.

The auditory screening is a routine part of the newborn's overall hospital care and would not be coded separately. <AHA, *Coding Clinic*, Q3, 2016>
