

Medicare Utilization Review Version

KEY CONCEPTS OUTLINE

Module 10: Outpatient Payment Systems and Patient Liability

I. Part B Payment for Hospital Outpatient and Specified Inpatient Services

Payment systems for Medicare Part B payment of hospital services:

- **Outpatient Prospective Payment System (OPPS)** – most services, including procedures, visits, drugs, and diagnostic services, except lab
- **Medicare Physician Fee Schedule (MPFS)** – PT, OT, ST, specified off-campus services, miscellaneous education and preventative services
- **Clinical Laboratory Fee Schedule (CLFS)** – molecular pathology, preventative labs, reference labs, and other labs not paid as part of a visit or procedure
- **Durable Medical Equipment, Prosthetics and Orthotics (DME POS) Fee Schedule** – DME not paid as part of a visit or procedure
- **Ambulance Fee Schedule** – ambulance services

A. Part B payment is HCPCS code driven. CMS publishes a master list of all HCPCS codes (OPPS Addendum B) which identifies the payment system for each code using a Status Indicator and the payment amount under OPPS, if applicable.

1. Addendum B is published with the OPPS Final Rule each year and updated on a quarterly basis. Handout 14 is a sample page from Addendum B.

Link: [OPPS – Addendum A & B under Medicare-Related Sites - Hospital](#)

2. Addendum D provides a key to the Status Indicators and is published with the OPPS Final Rule each year. Handout 15 is the current Addendum D.

Caution: The fact a HCPCS code is assigned a payable Status Indicator does not mean the item or service is covered under Medicare. The Status Indicator simply indicates how the item or service will be paid if the service meets coverage requirements.

II. Overview of the Outpatient Prospective Payment System (OPPS)

A. Applicability of the OPPS

1. The OPPS applies to most hospitals, except certain Maryland hospitals and Critical Access Hospitals¹. <42 C.F.R. 419.20>
2. The OPPS excludes payment for services already included in payments to other providers treating the patient, e.g., services and supplies for ESRD patients and specified services for SNF patients. <42 C.F.R. 419.22(m)(2) and (o)>

B. Ambulatory Payment Classifications (“APCs”)

1. APCs are outpatient payment groups (similar to inpatient DRGs) that set a single payment rate for a group of HCPCS codes that are clinically similar and have comparable resource use. <42 C.F.R. 419.31(a)>
2. Addendum A is the master list of APCs and is published with the OPPS Final Rule each year and updated on a quarterly basis. Handout 16 is a sample page from Addendum A

Each OPPS payable HCPCS code maps to an APC and all HCPCS codes mapped to the same APC have the same payment rate.

C. Comprehensive APCs (C-APCs)

1. C-APCs are special APCs that provide for a single encounter-based payment for most services rendered during a single encounter reported together on the same claim.

Services excluded from the C-APC payment and paid separately:

- Ambulance Services
- Preventative services
- Screening and diagnostic mammography
- Pass-through (new) drugs, biologicals, and devices
- Brachytherapy seeds and sources
- Therapy under a pre-established therapy plan of care
- Cost based services (vaccines, corneal tissue, rural CRNA services)
- COVID-19 Treatments

Non-covered services, including self-administered drugs, are also excluded.

¹ Critical Access Hospitals are paid 101% of their costs, calculated by applying the hospitals outpatient cost to charge ratio (CCR) to the total charge for observation, subject to cost report settlement.

2. There are three types of C-APCs:
 - a. HCPCS codes with status indicator J1 trigger surgical C-APCs.
 - b. HCPCS codes with status indicator J2 trigger the Observation C-APC, as discussed in a prior module.
 - c. Inpatient only procedures reported with modifier -CA are paid under a special C-APC, as discussed in a prior module.

Table 2 of the CY2023 OPPS Final Rule contains a list of the finalized C-APC and is included for reference in the materials behind the outline.

3. Steps to determine assignment of a surgical C-APC
 - a. Identify the highest-ranking Status Indicator J1 procedure on Addendum J of the OPPS Final Rule. This “primary” procedure will control assignment of the C-APC.
 - b. Determine if the case qualifies for complexity adjustment by looking up the “primary” procedure on the complexity adjustment table of Addendum J. If one of the listed secondary or add-on codes is reported on the claim, the C-APC will receive a complexity adjustment, increasing the APC by one level.
 - c. Handout 17 contains a table with surgical C-APC assignment examples.

D. Packaged Services under OPPS

1. Packaged services are covered services that *are not separately payable*. Payment for packaged services is included in other separately payable services, whether or not they are clinically related.

Caution: Even though no separate payment is made from Medicare for packaged services, it is not appropriate to bill the patient for them because CMS considers payment for them to be included in payment for other paid items on the claim.

2. There are four types of packaged services:
 - a. Services identified by Status Indicator N are always packaged and never received separate payment. <OPPS Addendum D1>

Examples: hourly observation, supplies, most drug, including diagnostic drugs

- b. Services identified by Status Indicator Q1 are packaged if another service with Status Indicator S (significant service), T (surgical service), or V (visit) is reported on the same claim. <OPPS Addendum D1>
 - i. These services are only paid separately if no Status Indicator S, T, or V service is reported on the same claim. <OPPS Addendum D1>

Examples: minor procedures, x-rays, EKGs, pathology, blood bank services

- c. Services identified by Status Indicator Q2 are packaged if another service with Status Indicator T (surgical service) is reported on the same claim. <OPPS Addendum D1>
 - i. These services are only paid separately if no Status Indicator T service is reported on the same claim. <OPPS Addendum D1>

Examples: add-on procedures and diagnostic components of

- d. Laboratory services identified by Status Indicator Q4 are packaged if another service with Status Indicator J1, J2, S, T, V, Q1, Q2, or Q3 is reported on the same claim. <OPPS Addendum D1>
 - i. These laboratory services are paid separately under the CLFS only if no other OPPS payable service appears on the same claim.

Examples: clinical lab, except molecular pathology and preventative

- 3. Handout 18 is a table with packaging example case studies.

If more than one Q1 or Q2 code is reported, and packaging is not triggered, payment is made only for the highest paying Q1 or Q2 code.

III. Outpatient Deductibles and Coinsurance

- A. The Part B deductible for 2023 is \$226 per year. <87 Fed. Reg. 59084>

- B. The Part B coinsurance is typically 20%. <Medicare Claims Processing Manual, Chapter 4 § 30>

Four APCs have a coinsurance of higher than 20% due to a transitional calculation from the beginning of the OPSS. A table with affected APCs and their coinsurance percentage is included in the materials behind the outline.

- C. The coinsurance amount for any single APC, including the coinsurance for associated drugs, biologicals, and blood products, may not exceed the inpatient deductible for the applicable year (\$1556 for CY2022). <42 C.F.R. 419.41(c)(4)(i)>
- D. The coinsurance amount is calculated based on the payment rate prior to outlier adjustment. <42 C.F.R. 419.41(c)(4)(iv)>
- E. There is no deductible or coinsurance for the Initial Preventative Physical Exam or for preventative services that are covered by Medicare and recommended with a grade A or B by the United States Preventative Services Task Force. <Medicare Claims Processing Manual, Chapter 18 § 1.3>
1. A complete table of preventative services and whether they are subject to deductible and coinsurance is published in the *Medicare Claims Processing Manual*, Chapter 18 § 1.2.

5881	Ancillary Outpatient Services When Patient Dies	N/A	
8011	Comprehensive Observation Services	N/A	

C-APC Clinical Family Descriptor Key:

AENDO = Airway Endoscopy
 AICDP = Automatic Implantable Cardiac Defibrillators, Pacemakers, and Related Devices.
 BREAS = Breast Surgery
 COCHL = Cochlear Implant
 EBIDX = Excision/ Biopsy/Incision and Drainage
 ENTXX = ENT Procedures
 EPHYS = Cardiac Electrophysiology/
 EVASC = Endovascular Procedures
 EXEYE = Extraocular Ophthalmic Surgery
 GIXXX = Gastrointestinal Procedures
 GYNXX = Gynecologic Procedures
 INEYE = Intraocular Surgery
 LAPXX = Laparoscopic Procedures
 NERVE = Nerve Procedures
 NSTIM = Neurostimulators
 ORTHO = Orthopedic Surgery
 PUMPS = Implantable Drug Delivery Systems
 RADTX = Radiation Oncology
 SCTXX = Stem Cell Transplant
 UROXX = Urologic Procedures
 VASCX = Vascular Procedures
 WPMXX = Wireless PA Pressure Monitor

APC	Group Title	SI	Relative Weight	Payment Rate	National Unadjusted Copayment	Minimum Unadjusted Copayment	Coinsurance Percentage
5166	Cochlear Implant Procedure	J1	389.5196	\$33,337.03	\$7,276.58	\$6,667.41	21.8273%
5191	Level 1 Endovascular Procedures	J1	34.5675	\$2,958.46	\$863.75	\$591.70	29.1959%
5416	Level 6 Gynecologic Procedures	J1	80.9202	\$6,925.56	\$1,404.15	\$1,385.12	20.2749%
5611	Level 1 Therapeutic Radiation Treatment Preparation	S	1.5584	\$133.38	\$32.03	\$26.68	24.0141%
