ICU Trauma Room Rate	0208		\$ 4,500

*Pre-billing edit can strip HCPCS code G0390 from outpatient claim when ED visit level is not critical care. An alternative is to build another set of trauma activation codes with pre-ED notification that are only charged when the ED visit level is also critical care 99291

**Second set of charges for trauma activations post-ED arrival that do not qualify for revenue code 068x, but are at same prices reflecting same resource use/cost to activate teams for these patients

***While the same CPT code of 99285 is on two different ED charges, the underlying cost of critical care less than 30 minutes versus a non-critically ill or injured patient reaching a level 5 ED visit per guidelines reflects very different resource use/cost by these patients, while continuing to meet billing requirement to no charge a critical care CPT code unless 30 minutes or more of time has elapsed.
