

HANDOUT 18

Sample Workflow for Inpatient Only Procedures

Assumptions:

1. Inpatient Only procedures are identified in the surgery procedure list of the Surgery Information System
2. Surgery scheduler will check each surgery schedule request to determine if the procedure(s) is IP Only when the patient is Medicare
3. Admitting pre-registers accounts based on surgery scheduler request
4. Medicare accounts scheduled for IP Only procedures are flagged in the Medical Record (e.g., a stamp, flag or change in the EMR banner for the account)
